1998 Journal of Fluids Engineering Index
Index by Subject Matter to JFE, Vol. 120
Nos. 1–4, 1998

AIRFOILS AND HYDROFOILS

Numerical Study of the Steady-State Tip Vortex Flow Over a Finite-Span Hydrofoil. Chao-Tsung Hsiao and Laura L. Pauley, June, 345–353.

A Simple Analytical Theory for Interpreting Measured Total Pressure in Multiphase Flows, Abhijit Guha, June, 385–389.

BLUFF-BODY FLOWS

Effect of Trailing Edge Suction on Coherent Structures in Near Wake, S. D. Sharma and R. K. Sahoo, June, 378–384.

Turbulent Flow Past an Array of Bluff Bodies Aligned Along the Channel Axis, Tong-Miin Liou and Shih-Hui Chen, September, 520–530.

Heterogeneous Drag Reduction Concepts and Consequences, Klaus W. Hoyer and Albert Gyr, December, 818–823.

Fluid Dynamic Drag of an Axially Symmetrical Bluff Body Consisting of a Plane Surface and a Spherical Surface, S. Aiba, December, 851–853.

BOUNDARY LAYER AND SHEAR FLOWS

Prediction of Solid/Free-Surface Juncture Boundary Layer and Wake of a Surface-Piercing Flat Plate at Low Froude Number, Madhu Sreedhar and Fred Stern, June, 354–362.

On the Wall-Pressure Spectrum Under a Three-Dimensional Boundary Layer, Ronald L. Panton, June, 407–410.

Perspective: Flow at High Reynolds Number and Over Rough Surfaces—Achilles Heel of CFD, V. C. Patel, September, 434–444.

Spatial Structure of Negative $\partial\bar{u}/\partial y$ in a Low R_θ Turbulent Boundary Layer, Joseph C. Klewicki and Rodney B. Hill, December, 772–777.

CAVITATION

Influence of the Nuclei on the Cavitation Inception for Different Types of Cavitation on Ship Propellers, B. Gindroz and M. L. Billet, March, 171–178.

Quantitative Evaluation of Cavitation Erosion, Shuji Hattori, Hiroyuki Mori, and Tsunenori Okada, March, 179–185.

A New Approach to Evaluate the Cavitation Erosion Power, Regiane Fortes Patella and Jean-Luc Reboud, June, 335–344.

A New Calibration Method for Dynamically Loaded Transducers and Its Application to Cavitation Impact Measurement, Hitoshi Soyama, Andrzej Lichtarowicz, Takahiro Momma, and Edward J. Williams, December, 712–718.

Prediction of Cavitation Erosion: An Energy Approach, F. Pereira, F. Avellan, and Ph. Dupont, December, 719–727.

Cavitation Nuclei Population and Event Rates, Zhenhuan Liu and Christopher E. Brennen, December, 728–737.

COMPRESSIBLE FLOW

Wing Section Optimization for Supersonic Viscous Flow, Cem C. Item and Oktay Baysal, March, 102–108.

Supersonic Jet Noise Reductions Predicted with Increased Jet Spreading Rate, Milo D. Dahl and Philip J. Morris, September, 471–476.

Some Explicit Analytical Solutions of Unsteady Compressible Flow, Ruixian Cai, December, 760–764.

COMPUTATIONAL METHODS

A Procedure for Using DNS Databases, S. Parneix, D. Laurence, and P. A. Durbin, March, 40–47.

A Large-Eddy Simulation of the Near Wake of a Circular Cylinder, S. A. Jordan and S. A. Ragab, June, 243–252.

An Implicit Multigrid Scheme for the Compressible Navier-Stokes Equations with Low-Reynolds-Number Turbulence Closure, Peter Gerlinger and Dieter Brüggemann, June, 257–262.

An h-Adaptive Finite Element Model for Environmental Transport Prediction, D. B. Carrington and D. W. Pepper, June, 406–407.

A Wall-Distance-Free k-ϵ Model with Enhanced Near-Wall Treatment, U. Goldberg, O. Peroomian, and S. Chakravarthy, September, 457–462.

A Time-Marching Method for Calculation of Nonsimilar 3D Boundary Layers on Turbomachinery Blades, W. Asvapoositkul and M. Zangeneh, December, 799–807.

FLOW CONTROL

Boundary-Layer Control by Electric Fields, R. Vilela Mendes and J. A. Dente, September, 626–629.

Heterogeneous Drag Reduction Concepts and Consequences, Klaus W. Hoyer and Albert Gyr, December, 818–823.

FLOW MEASUREMENTS

The Systematic Uncertainty of Laboratory Flow Calibrations, D. R. Keyser, March, 19–22.

Direct Measurements of Turbulent Boundary Layer Wall Pressure Wavenumber-Frequency Spectra, B. M. Abraham and W. L. Keith, March, 29–39.

Angular Range and Uncertainty Analysis of Nonorthogonal Crossed Hot Wire Probes, Eduardo Blanco-Marigorta, Rafael Ballesteros-Tajadura, and Carlos Santolaria, March, 90–94.

Application of Neural Networks and Fuzzy Logic to the Calibration of the Seven-Hole Probe, O. K. Rediniotis and G. Chrysanthakopoulos, March 95–101.

Refractive-Index-Matching Laser Velocimetry for Complex, Isothermal Flows, B. E. Thompson, O. Bouchery, and K. D. Lowney, March, 204–207.

Laser Pointing Stability and Alignment Techniques, Gerald L. Morrison and Brian G. Wiedner, March, 213–215.

Skin Friction Measurements in a Gas-Liquid Pipe Flow Via Optical Interferometry, T. J. Garrison, E. Manceau, and D. E. Nikitopoulos, June, 303–310.

CFD Simulation and Experimental Validation of a New Closed Circuit Wind/Water Tunnel Design, Robert Gordon and Mohammed S. Imbabi, June, 311–318.

A Methodology for Determining Experimental Uncertainties in Regressions, K. K. Brown, H. W. Coleman, and W. Glenn Steele, September, 445–456.

High-Speed PIV Analysis Using Compressed Image Correlation, Douglas P. Hart, September, 463–470.

Elements of an Approach to the Assessment of Systematic Uncertainty in Transient Measurements, Paul K. Maciejewski, December, 755–759.

FLOWS THROUGH POROUS MEDIA

Numerical Modeling of Non-Newtonian Fluid Flow in a Porous Medium Using a Three-Dimensional Periodic Array, Masahiko Inoue and Akira Nakayama, March, 131–135.

Axial Pressure Distribution in the Entrance Region of Packed Beds of Spheres, J. D. McWhirter, M. E. Crawford, and D. E. Klein, September, 631–634.

FLUID MACHINERY

Time Resolved Torque of Three-Dimensional Rotating Bluff Bodies in a Cylindrical Tank, D. Maynes, J. Klewicki, and P. McMurtry, March, 23–28.

Combustors for Micro-Gas Turbine Engines, Ian A. Waitz, Gautam Gauba, and Yang-Sheng Tzeng, March, 109–117.

 Copyright © 1999 by ASME

An Experimental Study of Swirling Flow Pneumatic Conveying System in a Vertical Pipeline, Hui Li and Yuji Tomita, March, 200–203.
Simulation of the Piston Driven Flow Inside a Cylinder with an Eccentric Port, Adrin Gharakhani and Ahmed F. Ghoniem, June, 319–326.
Prediction of Air-Water Two-Phase Flow Performance of a Centrifugal Pump Based on One-Dimensional Two-Fluid Model, Kiyoshi Minemura, Tomomi Uchiyama, Shinji Shoda, and Kazuyuki Egashira, June, 327–334.
Unbalanced Hydraulic Forces Caused by Geometrical Manufacturing Deviations of Centrifugal Impellers, Yoshiki Yoshida, Yoshinobu Tsujimoto, Takashi Kawakami, and Toru Sakatani, September, 531–537.
Steady and Unsteady Flow Field at Pump and Turbine Exits of a Torque Converter, Y. Dong, B. Lakshminarayana, and D. Maddock, September, 538–548.
Investigation and Control of Backflow Ahead of a Shrouded Inducer, C. Offtinger Brissaud, C. Henry, R. Morel, and F. Spettel, September, 549–555.
A Design Method for High-Speed Propulsor Blades, Paul E. Griffin and Spyros A. Kinnas, September, 556–562.
A Numerical Methodology to Predict Exnaust Plumes of Propulsion Nozzles, F. Nasuti, R. Niccoli, and M. Onofri, September, 563–569.
Three-Dimensional Blade Boundary Layer and Endwall Flow Development in the Nozzle Passage of a Single Stage Turbine, D. Ristic and B. Lakshminarayana, September, 570–579.
Centrifugal Pump Performance Drop Due to Leading Edge Cavitation: Numerical Predictions Compared with Model Tests, R. Hirschi, Ph. Dupont, F. Avellan, J.-N. Favre, J.-F. Guelich, and E. Parkinson, December, 705–711.
Sea Trials of the Ducted Tip Propeller, Ivar Hordnes and Sheldon I. Green, December, 808–817.

FLUID-STRUCTURE INTERACTIONS

Recirculation Zones in a Cylindrical Container, Craig C. Jahnke and Daniel T. Valentine, December, 680–684.
A Three-Dimensional Analysis of Rotordynamic Forces on Whirling and Cavitating Helical Inducers, Luca d'Agostino, Fabrizio d'Auria, and Christopher E. Brennen, December, 698–704.
Analysis of Fluid-Structure Interaction by Means of Dynamic Unstructured Meshes, F. J. Blom and P. Leyland, December, 792–798.

GENERAL TOPICS

Enhanced Power Spectrum Estimates Using Kalman Reconstruction, Lance H. Benedict and Richard D. Gould, June, 253–256.
Nonlinear Rupture Theory of a Thin Liquid Film with Insoluble Surfactant, Chi-Chuan Hwang, Chaur-Kie Lin, Da-Chih Hou, Wu-Yih Uen, and Jenn-Sen Lin, September, 598–604.
On the Creation of Stagnation Points in a Rotating Flow, T. Mullin, S. J. Tavener, and K. A. Cliffe, December, 685–689.
Thermoelectrically Driven Melt Motion During Floating Zone Crystal Growth with an Axial Magnetic Field, Y. Y. Khine and J. S. Walker, December, 839–843.

HEAT CONVECTION

Analytical Model of a Side-Heated Free Convection Loop Placed in a Transvere Magnetic Field, Nesreen Ghaddar, March, 62–69.
Pressure Drop and Heat Transfer of Magnetohydrodynamic Annular Two-Phase Flow in Rectangular Channel, H. Kumamaru and Y. Fujiwara, March, 152–159.
Flow Structure in a Rayleigh-Bénard Cell Upon Impulsive Spin-Up, Peter Vorobieff and Robert E. Ecke, December, 672–675.
Forced Convection During Liquid Encapsulated Crystal Growth with an Axial Magnetic Field, Nancy Ma, John Walker, David Bliss, and George Bryant, December, 844–850.

JET FLOWS

The Steady Horizontal Flow of a Wall Jet Into a Large-Width Cavity, K. O. Homan and S. L. Soo, March, 70–75.
Turbulence Structure of Plane Surface-Jets in a Weak Coflowing Stream for Different Initial Wake Conditions, R. Martinuzzi, A. M. Zaghloul, W. Al-Qaraguli, and R. E. Baddour, March, 76–82.
Numerical Simulation of Turbulent Jets with Rectangular Cross-Section, R. V. Wilson and A. O. Demuren, June, 285–290.
Flow Characteristics of Splined Tipped Circular Jets, A. A. S. Arefin Kabir, S. Dutta, and M. A. Taher Ali, June, 398–400.
A Note on the Characteristics of Droplet-Laden Jets, R. Balachandar, June, 403–406.
Numerical Study of Oscillation Mechanism in Underexpanded Jet Impinging on Plate, Y. Sakakibara and J. Iwamoto, September, 477–481.
Thickness Variation of a Liquid Sheet Formed by Two Impinging Jets Using Holographic Interferometry, Y.-B. Shen and D. Poulikakos, September, 482–487.
Experimental Investigations of Free-Surface Aeration in the Developing Flow of Two-Dimensional Water Jets, T. Brattberg, H. Chanson, and L. Toombes, December, 738–744.

MULTIPHASE FLOWS

Multi-Fractal Signal Simulation of Local Instantaneous Pressure in a Bubbling Gas-Fluidized Bed—Part 1: Signal Simulation, D. V. Pence and D. E. Beasley, March, 118–124.
Multi-Fractal Signal Simulation of Local Instantaneous Pressure in a Bubbling Gas-Fluidized Bed—Part 2: Chaos Assessment, D. V. Pence and D. E. Beasley, March, 125–130.
Turbulent Friction Factor for Two-Phase: Air-Powerlaw Fluid Flows Through Horizontal Tubes, B. K. Rao, March, 136–139.
Two-Phase Void Fraction and Pressure Drop in Horizontal Crossflow Across a Tube Bundle, G. P. Xu, K. W. Tou, and C. P. Tso, March, 140–145.
Flow Visualization in Bubbly Two-Phase Hydraulic Jump, Michele Mossa and Umberto Tolve, March, 160–165.
One-Dimensional Bubbly Cavitating Flows Through a Converging-Diverging Nozzle, Yi-Chun Wang and C. E. Brennen, March, 166–170.
First and Second-Order Accurate Schemes for Two-Fluid Models, Iztok Tiselj and Stojan Petelin, June, 363–368.
Relaxation Models for Wave Phenomena in Liquid-Vapor Bubble Flow in Channels, Z. Bilicki, D. Kardas, and E. E. Michaelides, June, 369–377.
Drop Size and Velocity Measurements in an Electrostatically Produced Hydrocarbon Spray, J. S. Shrimpton and A. J. Yule, September, 580–585.
Studies on the Behavior of Droplets and the Air Flow in a Hollow-Cone Spray, Tatsuyuki Okamoto, Toshimi Takagi, Toshikazu Kaji, Katsunori Shimazaki, and Kenji Nakanishi, September, 586–592.
The TAR Model for Calculation of Droplet/Wall Impingement, Haitao Xu, Yongchang Liu, Ping He, and Haiqing Wang, September, 593–597.
Two-Phase Flow from a Stratified Region Through a Small Side Branch, (Data Bank Contribution), I. G. Hassan, H. M. Soliman, G. E. Sims, and J. E. Kowalski, September, 605–612.
The Interaction of Spinning Liquid Film with Swirling Gas in Cylindrical Vessel—Experiments and Numerical Simulations, Avi Birk and James DeSpirito, December, 690–697.
The Influence of Atomizing Gas Molecular Weight on Low Mass Flowrate Effervescent Atomizer Performance, M. T. Lund, C. Q. Jian, P. E. Sojka, J. P. Gore, and M. V. Panchagnula, December, 750–754.

NON-NEWTONIAN FLOWS

Numerical Modeling of Non-Newtonian Fluid Flow in a Porous Medium Using a Three-Dimensional Periodic Array, Masahiko Inoue and Akira Nakayama, March, 131–135.

Asymptotic Flow Regimes in Pulsatile Flows of Bingham Plastics, K. J. Hammad and G. C. Vradis, March, 211–213.

On the Choking of the Flow of Piezoviscous Liquids, Scott Bair and M. M. Khonsari, September, 621–625.

Analytical Solution to Flux Enhancement in Laminar Concentrically Stratified Pipe Flow of Bingham and Newtonian Fluids, C. D. Buchanan, C. Kleinstreuer, and P. W. Longest, September, 629–631.

Coupling Between a Viscoelastic Gas/Liquid Interface and a Swirling Vortex Flow, J. M. Lopez and J. Chen, December, 655–661.

Numerical Simulation of Concentrated Emulsion Flows, Michael Loewenberg, December, 824–832.

PARTICULATE FLOW

Effects of Particulate Diffusion on the Compressible Boundary-Layer Flow of a Two-Phase Suspension Over a Horizontal Surface, Ali J. Chamkha, March, 146–151.

Simple Stochastic Model for Particle Dispersion Including Inertia, Trajectory-Crossing, and Continuity Effects, Emmanuel Etasse, Charles Meneveau, and Thierry Poinsot, March, 186–192.

A Note on Particle Size Measurements in Two-Phase Flows, R. Balachandar, S. R. Mulpuru, and M. H. Ungurian, June, 390–397.

Transport of Heavy Particles in a Three-Dimensional Mixing Layer, Qunzhen Wang and Kyle D. Squires, September, 613–620.

Particle Entrainment in a Bounded Rotating Flow with a Drain, J. Mang, E. Minkov, U. Schaflinger, and M. Ungarish, December, 676–679.

PIPE, DUCT, CHANNEL FLOWS

Review: Diffuser Design and Performance Analysis by a Unified Integral Method, (Data Bank Contribution), J. P. Johnston, March, 6–18.

Experimental Study of Flow in a High Aspect Ratio 90 Degree Curved Diffuser, B. Majumdar, Ratan Mohan, S. N. Singh, and D. P. Agrawal, March, 83–89.

Flow Regime Identification in Horizontal Channels with Different Types of Rod Clusters, H. G. Lele, S. K. Gupta, and V. Venkat Raj, March, 207–209.

Richardson's Annular Effect in Oscillating Laminar Duct Flows, A. Yakhot, M. Arad, and G. Ben-Dor, March, 209–211.

Experimental and Numerical Investigation into the Flow Characteristics of Channels Etched in ⟨100⟩ Silicon, S. M. Flockhart and R. S. Dhariwal, June, 291–295.

Study on the Deposition Profile Characteristics in the Micron-Scale Trench Using Direct Simulation Monte Carlo Method, Massato Ikegawa, Jun'ichi Kobayashi, and Morihisa Maruko, June, 296–302.

A Modified Borda-Carnot Relation for the Prediction of Maximum Recovery Pressure in Planar Sudden Expansion Flows, George Papadopoulos and M. Volkan Ötugen, June, 400–402.

Three-Dimensional Laminar Flow in a Rotating Multiple-Pass Square Channel with Sharp 180-Degree Turns, Jenn-Jiang Hwang and Dong-Yuo Lai, September, 488–495.

Methods to Set Up and Investigate Low Reynolds Number, Fully Developed Turbulent Plane Channel Flows, F. Durst, M. Fischer, J. Jovanovic, and H. Kikura, September, 496–503.

Flowfield Investigation of the Effect of Rib Open Area Ratio in a Rectangular Duct, Tong-Miin Liou, Chih-Wen Kao, and Shih-Hui Chen, September, 504–512.

Numerical Analysis of the Flow in an Annular-Conical Passage, K. Balatka and S. Mochizuki, September, 513–519.

Pipeline Leak Detection by Impulse Response Extraction, Chyr Pyng Liou, December, 833–838.

STABILITY AND TRANSITION

Instability of Taylor Vortex and Nonaxisymmetric Modes in Flow Between Rotating Porous Cylinders, Chin-Hwa Kong and Chi-Kuo Lee, December, 745–749.

TURBULENT FLOWS

Turbulence in Compressible Mixing Layers, Foluso Ladeinde, Wei Liu, and Edward E. O'Brien, March, 48–53.

An Experimental and Numerical Study of Turbulent Swirling Pipe Flows, R. R. Parchen and W. Steenbergen, March, 54–61.

Statistical Model of a Self-Similar Turbulent Plane Shear Layer, Zuu-Chang Hong and Ming-Hua Chen, June, 263–273.

Numerical Calculation of the Fully Developed Turbulent Flow in an Axially Rotating Pipe With a Second-Moment Closure, K.-J. Rinck and H. Beer, June, 274–279.

Anisotropy Invariants of Reynolds Stress Tensor in a Duct Flow and Turbulent Boundary Layer, A. Mazouz, L. Labraga, and C. Tournier, June, 280–284.

Identification of Coherent Structure in Turbulent Shear Flow with Wavelet Correlation Analysis, Hui Li, December, 778–785.

Turbulent Flow Through Spacer Grids in Rod Bundles, Sun Kyu Yang and Moon Ki Chung, December, 786–791.

UNSTEADY FLOWS

Some Explicit Analytical Solutions of Unsteady Compressible Flow, Ruixian Cai, December, 760–764.

VORTICES

Alternative Eddy Shedding Set Up by the Nonaxisymmetric Recirculation Zone at the Exhaust of a Cyclone Dust Separator, A. J. Griffiths, P. A. Yazdabadi, and N. Syred, March, 193–199.

A Survey of Time-Averaged Characteristics of Laminar and Turbulent Horseshoe Vortices, (Data Bank Contribution), F. Ballio, C. Bettoni, and S. Franzetti, June, 233–242.

Nonlinear Spin-Up of a Rotating Stratified Fluid: Theory, Richard E. Hewitt, Peter W. Duck, Michael R. Foster, and Peter A. Davies, December, 662–666.

Nonlinear Spin-Up of a Rotating Stratified Fluid: Experimental Method and Preliminary Results, Richard E. Hewitt, Peter A. Davies, Peter W. Duck, Michael R. Foster, and Fraser W. Smith, December, 667–671.

Turbulence Measurements of a Longitudinal Vortex Generated by an Inclined Jet in a Turbulent Boundary Layer, X. Zhang, December, 765–771.
